

Woodworking

Dubuque Senior High School

Instructor: **Mr. Michael Jensen**

Ph. 563-552-5577

mjensen@dbqschools.org

<https://mrjensensindustrialtechnology.shutterfly.com/>

Course Description:

This is an introductory course in which students will be taught the basic skills of woodworking. Topics include: joinery, identifying the different types and species of woods, and the processes used to produce a project. Students will be instructed in the proper and safe operation of equipment and tools used in the laboratory. A large portion of the class is hands on, where students will independently work on projects assigned by the instructor. This course is a pre-requisite for Cabinetmaking.

COMMENT: Safety glasses are required. A fee will be assessed for material consumed for optional projects. If this is a financial burden, please speak to the instructor, guidance counselor, or principal. Cost will not prevent a student from involvement in this program!

Standards:

This course is designed in alignment with the Iowa Core Curriculum 21st century technological literacy skills, as well as the ITEA Standards for Technological Literacy.

What Are We Going To Do In This Class?

<ul style="list-style-type: none">• Wood Technology• Selecting and Identifying Materials• Planning, Calculating, and Understanding Woodworking Prints• Measurements• Safety• Hand Tools	<ul style="list-style-type: none">• Power Tools and Equipment• Wood Joinery Techniques• Gluing and Clamping• Sanding• Finishing Techniques (applying stains and finishes)• Installing Hardware
--	---

Supplies/Course Expenses:

Students are responsible for always bringing a pencil and safety glasses to class! You will not be allowed to work if you do not have safety glasses.

Each student is responsible for the cost of their OWN woodworking projects. Any wood purchased from the school will be paid for BEFORE any processes start. This may include the following items:

Wood- Students will complete a required project for which all materials will be provided by the instructor. Additional projects will be paid for by the student. Prices vary depending on the size of the project that the student chooses to make.

Finish- A limited amount of stain is available at school, however, the color choices are limited and there is no guarantee that the student will get the color that they want if someone else gets to it first. For the best quality, it is recommended that the student bring in their own, or find another student who wants the same finish to share the costs.

Hardware- If any hardware is needed (hinges, latches, pegs, etc.) the student must purchase themselves at home improvement stores or online vendors

Safety Glasses- Each student is required to wear safety glasses while present in the lab, or if any other person is running a machine in the lab area. This means that if I am giving a demonstration, or if the student falls behind on bookwork and must remain in the classroom portion of the woodworking facility, they must still wear their glasses while others students or the instructor are working. Students can purchase safety glasses at the business office or other retailers such as Lowes, Menards, hardware stores, or online. The cost is generally \$3-\$5 depending on where you purchase. If a student does not have the funds to purchase safety glasses, they should speak to the instructor or guidance counselor immediately to find a solution.

Instructional Strategies

The instructor of this course will use a variety of instructional strategies to deliver the appropriate materials in a manner to inform all students. These strategies will include: direct instruction, active participation, presentation/demonstration, probing questions, student projects, and just-in-time instruction.

Assessments

Summative- These will be in the form of 4 projects. Students will be made aware of the due dates, and detailed expectations that they will be graded based on.

Quizzes- Students will have to pass a safety quiz for each of the machines that they will be operating in the class. A student is only considered to have passed the quiz if they score 100%, however, the score they receive on the FIRST ATTEMPT at the safety quiz will be the score that goes into the gradebook.

Formative- I will ask students guiding questions, along with close observation of their activities in the lab in order to assess the development of their skills. This will also be the way that I assess their safety practices and lab maintenance participation. Student will be given weekly work points based on their safety skills and contribution to lab cleanup.

Grading

Your grade will be based on the following:

Projects- This will be the majority of the student's grade. Students will complete four projects assigned by the instructor. These projects will be worth 150 points and will be judge based on a set of criteria that will be handed out prior to the start of the project. If time allows the student will then choose a project of their choice, and complete the project to the best of their ability with their newly acquired skills. This additional project will be worth a total of 100 points.

Quizzes- Students will complete a series of safety quizzes for the machines that they will operate in the lab for which they will receive a grade based on their ability to choose the appropriate answer for each safety situation/question.

Worksheets- Students will complete a series of worksheets in class in order to broaden their knowledge on woodworking techniques, safety practices, and the machines that they will operate in class. Each worksheet is worth approximately 25 points, and will complete approximately 30% of the grade.

Weekly Points- Students will be graded weekly based on a 5 point per day scale. This grade will be based on the student's ability to work safely and efficiently in the classroom and lab, as well as their contribution to clean up at the end of every class period.

Extra Credit- Extra credit may be offered but only if students have successfully completed all assignments and projects.

Grading Scale:

93.0 – 100% A	73.0 – 76.99 C
90.0 – 92.99 A-	70.0 – 62.99 C-
87.0 – 89.99 B+	67.0 – 69.99 D+
83.0 – 86.99 B	63.0 – 66.99 D
80.0 – 82.99 B-	60.0 – 62.99 D-
77.0 – 79.99 C+	Below 60% F

Absences

If you are absent for any reason, it is your responsibility to make up the worksheets on your own time. You can check out a book from me if necessary, or arrange time during your study period to come in to work. Once we start working in the lab, it is very important to do your best to come every day. If you are absent, you may try to arrange a time to come in outside of class to work.

Getting Help

If for any reason you are struggling in the class, please come to me for extra help. If you are unsure how to run a machine, or are nervous, please ask me for assistance. These will be around 20 students in the

class, so you may have to be patient, but please wait if you are unsure on how to complete a process so that you will not injure yourself, anyone else, or ruin your project. I am ALWAYS willing to come in before school to allow you to work.

Behavior Expectations

Every student must return a signed copy of this syllabus, as well as a signed copy of the safety agreement, before beginning work in the lab area.

- Work safely
- Report any injury to me immediately after it happens.
- You are responsible for the tools and equipment you are using. If you break something because of carelessness, you are responsible for it.
- Report anything that is missing or damaged immediately.
- Clean up at the end of each class period.
- Safety glasses will be worn when any tools or equipment is being operated by ANY person in the room. No one can operate any tool/equipment unless they meet all the PPE requirements, have received a demonstration, passed a safety test, and the Technology education teacher is present in the room.
- No food or drink are to be brought into the classroom. Individual music players cannot be worn during class without approval from the instructor. Cell phones must be kept out of sight during class or they will be put into my desk drawer for the remainder of the class period.

STUDENTS WHO ARE DISRUPTIVE OR POSE A THREAT TO THEMSELVES OR OTHERS MAY BE REMOVED FROM CLASS AND SENT TO THE AP OFFICE.

Communication

The best way to contact me with questions or concerns is via email (mjensen@dbgschools.org). You may also reach me by telephone 563-552-5577. Messages left will be returned as soon as possible. I also update PowerSchool on a regular basis (at least once weekly).

Parent Awareness:

Parents/guardians and students should both be aware of the requirements of the class. Sign and date below to indicate you have read this syllabus and are aware of the expectations and responsibilities of the class. Return to instructor.
