## Dubuque Community School District Seeks Parental Input

***There's Still Time!! Survey Closes November 21!***

Preparing students for the future certainly means that we need students who can utilize technology as a tool for a variety of purposes. The goal in our schools has moved beyond simply having enough devices, to successfully integrating technology into the overall instructional program across our school district. In order to help both the district and our school identify needs, parents, staff and intermediate students are being asked to share their perception regarding the use of technology in our school. To collect this perception data regarding technology, the district has developed a short survey. Simply copy and paste the URL below into your internet browser to access the survey.

[www.BByt.es/Z27AP](http://www.BByt.es/Z27AP)

If you have children at other schools, you may have already completed this survey in regards to the practices at that school. We ask that you also complete one for Bryant. The information is school-specific.

Once the data has been compiled and analyzed by the district, goals will be established to move us forward in using technology as an integral component of our instructional programming.

We thank you for taking the time to give us this feedback.
